PULSE

*Transforming Regulatory Reporting Through
Intelligent Data Exchange*

PULSE

As insurance markets continue to evolve, regulators require timely, accurate, and standardized data to strengthen regulatory oversight, improve transparency, and make informed decisions. Traditional reporting processes often rely on fragmented systems, manual submissions, and inconsistent data formats, resulting in delays, compliance challenges, and limited visibility into industry performance.

Infosion Pulse is a centralized Insurance Regulatory Reporting & Data Exchange Platform that securely exchanges regulatory data between insurers' core insurance systems and regulators' reporting systems through API integration and standardized reporting mechanisms. The platform automates data validation, supports multiple submission channels, standardizes regulatory reporting, and generates real-time industry analytics—enabling regulators to strengthen compliance oversight while simplifying regulatory reporting for insurers.

PLATFORM FEATURES

- **Real-Time Data Submission**

Enable insurers to submit regulatory data instantly through secure APIs, localized reporting templates, or file uploads, ensuring timely and accurate regulatory reporting.
- **Real-Time Regulatory Dashboard**

Provide regulators with a centralized dashboard offering live visibility into insurer submissions, compliance status, reporting progress, industry KPIs, and regulatory exceptions.
- **Insurance Data Intelligence**

Leverage advanced analytics and AI-driven predictive insights to identify market trends, monitor industry performance, detect anomalies, and support proactive regulatory decision-making.
- **Actionable Regulatory Guidance**

Generate intelligent alerts, recommendations, and early warning indicators based on reporting trends, compliance risks, and predictive analytics to help regulators take timely and informed actions.

Infosion

Infosion Software Private Limited founded in 2005, is a global insurtech company delivering proven technology solutions across the insurance ecosystem. We combine deep insurance expertise with intelligent technology across Core Insurance, Connected Ecosystems, and Digital Business.
