RECOVEREZ

*Accelerate Recovery Time & Reduce
Recovery Costs*

RECOVEREZ

RecoverEZ, the cloud-based platform from Infosion, empowers insurers to:

- Track outstanding recoveries across insurance companies
- Minimize missed recovery opportunities by using Artificial Intelligence
- Measure and reduce the recovery processing time
- Efficiently manage claims recovery process by storing claims history and all related documents digitally at one centralized digital location

Experience the power of AI by improving efficiency and processing times in intra-company motor claims recovery with RecoverEZ from Infosion.

Elevate your claims recovery operations with Infosion RecoverEZ. Our cloud-based digital platform simplifies motor claim recovery processes, reduces the processing times and reconciliation times. Overcoming common challenges like documents exchange, history maintenance, and processing times. RecoverEZ ensures transparent communication and swift reconciliation, empowering insurers to thrive in today's competitive landscape. Additionally, the platform is powered with guided analytics, providing key insights for users to make informed decisions and optimize their recovery strategies.

KEY BENEFITS

**Real-time recovery claims
reconciliation**

**Real-time validation of
policy details**

**Paperless
processing**

**Reduce claims recovery
processing time**

PLATFORM FEATURES

Real-time Collaboration

Experience instant connectivity with insurers across the insurance ecosystem, facilitating faster communication and collaboration.

Rule-based Automated Recovery

Define universal or insurer-specific thresholds for automatic claims recovery approval, enhancing efficiency and reducing manual intervention.

Real-time Notification

Stay informed with real-time notifications, enabling transparent collaboration and tracking of recovery stages from request to settlement.

Centralized Ecosystem

Connect all insurers within a country to streamline intra-company claims recovery settlements transparently and efficiently, reducing administrative burdens.

Automatic Reconciliation

Instantaneously reconcile recoveries posted against and by third-party insurers, minimizing errors and monetary loss through efficient processes.

Dynamic Dashboards

Gain real-time access to key operational reports and dashboards, providing valuable insights into claims payable and receivable for informed decision-making.

In-Built Document Management System

Securely store and manage multiple document types, ensuring data protection and accessibility within a highly secured setup.

Threshold-based Approval

Define automatic approval thresholds for specific claim types, improving efficiency and reducing manual approval processes.

Infosion

Infosion Software Private Limited founded in 2005, is a global insurtech company delivering proven technology solutions across the insurance ecosystem. We combine deep insurance expertise with intelligent technology across Core Insurance, Connected Ecosystems, and Digital Business.
