NOVA – ERP INSURANCE SYSTEM

*Built for Insurers. Designed for
Governance. Engineered for Growth.*

NOVA – INSURANCE ERP SYSTEM

Insurance organizations require more than policy administration systems to effectively govern enterprise operations, financial controls, and corporate resources. Assets, investments, property portfolios, procurement activities, legal processes, human resources, and corporate governance functions all play a critical role in maintaining operational efficiency, financial discipline, and regulatory compliance.

Traditional ERP platforms often lack the industry-specific controls, governance frameworks, and operational capabilities required by modern insurance organizations. **Nova ERP** is an insurance-focused enterprise operations platform that unifies governance, operational control, financial oversight, and resource management within a single integrated ecosystem.

KEY HIGHLIGHTS

Nova is designed to address the core priorities of modern insurers — enabling them to operate smarter, respond faster, and scale efficiently.

INSURANCE-FOCUSED

Designed around the specific financial, operational, and governance requirements of insurers.

UNIFIED OPERATIONAL CONTROL

Bring critical back-office functions together through one integrated platform.

SEAMLESS CORE INTEGRATION

Connect with existing core insurance systems for consistent data and processes.

COMPLIANCE & FINANCIAL CONTROL

Strengthen auditability, financial discipline, and support for IFRS and regulatory requirements.

KEY FEATURES

Property Management

Leased premises & rental income portfolio accounting

Investment Management

Investment placements linked to reserve coverage, renewals & accrual

Asset Management

Asset tagging, depreciation, impairment aligned to IFRS compliance

Shareholders Capital & Dividend Management

Capital structure integrity + dividend processes

Fleet Management

Fleet / mobility assets — trips, fuel, maintenance utilization

Purchase Management

RFQ→PO with performance security for surveyors, garages, salvage vendors

Legal Process Management

Case lifecycle for claim disputes, recovery, negligence & EP filing

Inventory Management

Consumables & parts tracking for repair operations / loss mitigation
