NOVA – LIFE INSURANCE SYSTEM

*A Proven Core System for Complete Life
Insurance Operations*

NOVA – LIFE INSURANCE SYSTEM

As customer expectations continue to evolve and life insurers manage increasingly complex products and long-term policyholder relationships, insurers must deliver faster, more personalized, and digitally connected experiences. Managing individual and group life policies, underwriting risks, premium collections, policy servicing, and claims processing require more than traditional systems—it demands a scalable, intelligent, and future-ready platform.

Nova – Life Insurance System is built to address these challenges—enabling life insurers to streamline operations, strengthen underwriting processes, enhance customer engagement, and deliver seamless policy lifecycle management through intelligent automation and digital connectivity

KEY HIGHLIGHTS

Nova is designed to address the core priorities of modern insurers — enabling them to operate smarter, respond faster, and scale efficiently

INTELLIGENT POLICY LIFECYCLE MANAGEMENT

Simplify end-to-end policy administration—from onboarding and underwriting to renewals, servicing, maturity, and claims management.

AUTOMATED UNDERWRITING & RISK ASSESSMENT

Enhance underwriting efficiency with configurable workflows, automated validations, and intelligent risk evaluation capabilities.

UNIFIED DIGITAL EXPERIENCE

Enable policyholders, agents, brokers, and partners with self-service portals and real-time access to policy and servicing information

FLEXIBLE PRODUCT CONFIGURATION

Quickly launch and manage individual, group, savings, pension, & investment-linked life insurance products through a configurable, workflow-driven system.

KEY FEATURES

- **Configuration-Driven Life Products**
Design and manage individual and group life insurance products with flexible, no-code configuration capabilities.
- **Intelligent Underwriting Automation**
Digitize underwriting workflows, improve risk assessment accuracy, and reduce manual processing efforts.
- **End-to-End Policy Administration**
Centralize policy lifecycle management, including issuance, renewals, servicing, maturity, and surrender.
- **Claims & Benefits Management**
Automate life claims, benefits management, and claims settlements for faster processing.
- **Agent & Distribution Management**
Support agents, brokers, bancassurance, & multi-channel distribution operations through an integrated ecosystem.
- **Policyholder Self-Service Platform**
Deliver enhanced digital experiences with self-service access for policyholders, agents, and ecosystem partners.
